

NRG+ 2

The New Energy Generating Revolving Door

by  **BOON EDAM**

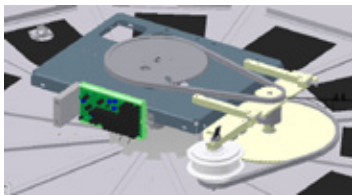

**Higher Output (up to 180 Watts)
Flexible Design
Progressive Speed Control
Green Ambiance Feedback
Cost Effective**

Worldwide Launch: 01/02/2012

Saving + Generating Energy!

Boon Edam had been tinkering with the idea of an energy generating revolving door for more than a decade when a Dutch architect put a concrete request before them. From that moment development took flight. Having installed the first NRG+Tourniket in 2008, Boon Edam continued development and will now be releasing a new version of the energy generating revolving door, the NRG+ 2. Equipped with a new state of the art generator, the NRG+ 2 combines a better functionality and a higher power output to save even more energy, and therefore more money.

How it works!

Super capacitors
main control board

Generator

Green Ambient
Feedback

The revolving door concept, 'Always open, Always closed' is the first step to saving energy... generating energy is the next!

Doorset:
3 or 4 wings
Rigid or
Collapsible

Canopy: 300 - 1200mm

HUC: <= 2600mm

Diameter: 2000 - 2800mm
